

PULITORE DISINFETTANTE **DISINFECTANT CLEANER**

Pulitore Disinfettante - Calchèra San Giorgio is a neutral product made using quaternary ammonium salts. Suitable for cleaning and disinfecting supports attacked by biodeteriogens. Its wide spectrum of action eliminates algae, moss, lichens, yeasts, moulds and bacteria responsible for bio-deterioration of architectural materials.

FIELDS OF APPLICATION

Natural stones (marble, granite, travertine, sandstone), brick, concrete, monumental stone elements, building materials and finishes.

APPLICATION

Apply the pure product with brush or with a low pressure dispenser, covering abundantly the part to be treated.

Wait 24 hours and then rinse abundantly with pressurized water or brush with a soft brush, rinsing with clean water and treating the surface with a sponge. In the areas with thick layers of microorganisms it is recommended to brush or clean the surface in advance with pressurized water in order to remove the superficial layers and to allow a better penetration of the product. Pulitore Disinfettante – Calchèra San Giorgio must be applied before all other cleaning and/or protection systems.

APPLICATION TEMPERATURE

Apply at room and surface temperature between +5°C and +35°C.

CONSUMPTION

Approximately 0,1 – 0,3 Lt/m² depending on the support.

An exact assessment can only be made after sampling.

TECHNICAL DATA

Colour	Colourless
Form	Liquid
Specific weight	1 Kg/L ± 0,1
Dilution	Ready-to-use product
pH	7,2

PACKAGING

5 – 10 Lt canister

STORAGE

Keep the canister closed in a dry and well-ventilated area. Apply within 12 months from the date of manufacture.
